

**US 36/US 68 Intersection Improvement Rebid
(ODOT PID #103793)
Addendum #4**

To: All Bidders

From: Tyler Bumbalough; City of Urbana Engineer

Date: February 21, 2019

Re: Addendum #4

Addition of Urban Resurfacing into US 36/US 68 Intersection Improvement

ODOT's Urban Resurfacing Project (formerly PID 100783, CHP-36/68-14.88/6.55) is hereby incorporated into the US 36/US 68 Intersection Improvement (PID 103793, CHP-US36-14.88). Separate, ODOT-developed plans are contained herein for the final milling, resurfacing and striping of the roundabout, including one block in each direction.

It is the City of Urbana's and ODOT's intention that these projects be bid as one. The bid proposal sheets for the urban paving portion are already included in the bid documents released with the rebid.

Any reference to paving "by others" or the like in the CHP-US36-14.88 plans is hereby negated. Any reference to surface course thickness or asphalt mix type within those plans is also negated and replaced by ODOT's CHP-36/68-14.88/6.55 plans.

Once all safety improvements, water line work and other roadwork is complete on all legs of the roundabout including one block in each direction, the contractor shall mill and pave the entire pavement area in one mobilization.

The interim completion date of 8/31/19 and the delayed start date for paving of 9/13/19 are no longer in effect since "Project Coordination," found on sheet 7, is no longer applicable.
